## EDUCATION

### Bharathidasan University

*Bachelor of Technology in Computer Science and Engineering*

Tiruchirappalli, Tamil Nadu

*July 2020 – May 2024*

### Bharathi Vidhyalaya Matric Hr.Sec.School

*Senior Secondary (12th Standard)*

Dharapuram, Tamil Nadu

*June 2019 – April 2020*

## EXPERIENCE

### Final Year Project: Product Recommendation System

2024

*Technologies Used: HTML5, CSS3, Python, LLM, CNN*

- Developed a Product Recommendation System combining Convolutional Neural Networks (CNN) and a Large Language Model (LLM) to enhance product recommendations through image and text data analysis.
- Enhanced e-commerce sales through better product recommendations.

### Kumo E-commerce Website

2024

*Technologies Used: HTML5, CSS3*

- Designed and developed an e-commerce website with a focus on a visually engaging user interface.
- Ensured a smooth browsing experience with clear product displays.

### Weather App

2024

*Technologies Used: API Interactions, React.js, TailwindCSS*

- Developed a weather application displaying current weather for various cities.
- Integrated with an API to fetch real-time weather data and presented it in a user-friendly interface.

### GreenDen - Plant Shopping Website

2024

*Technologies Used: React.js, TailwindCSS*

- Developed an e-commerce site using React.js with a focus on smooth navigation and responsive design.
- Implemented routing for seamless page transitions, allowing users to explore different sections easily.

### Actodo

2024

*Technologies Used: React.js, TailwindCss*

- Created a web application with user authentication, including sign-in and login pages.
- Developed an interactive to-do list interface for adding and deleting daily tasks.
- Focused on form validation and the to-do list concept.

### Burger King

2024

*Technologies Used: HTML5, CSS3, JavaScript*

- Developed a Burger King restaurant website featuring a navigation bar for easy browsing, a menu section showcasing offerings, a services area, and an about us page detailing Burger King.

## CERTIFICATION

### MERN Stack Web Development

@ Error Makes Clever

December 2023 – February 2024

## TECHNICAL SKILLS

**Programming Language:** JavaScript

**Web Design:** HTML5, CSS3

**Frameworks:** React.js

**Run Time Environment:** Node.js+NPM

**Core Competencies:** API, Git and GitHub

**Soft Skills:** Communication, Team Collaboration, Adaptability.

## LANGUAGES

**English:** Fluent (Speaking, Reading, Writing)

**Tamil:** Native Proficiency (Speaking, Reading, Writing)
